Summary

5 years of experience working on projects of various levels of complexity. Having worked with lots of technologies, environments, setups and people I possess the experience and confidence to build any kind of project from scratch.

I love to build and create, thus my main focus is on start-ups and dynamically developing projects.

I prefer working remotely but would also consider onsite jobs in Kyiv, Ukraine as well.

Advanced English speaker.

Skills

- PHP (SOLID, PSR, OOP, OOD, commitment to best practices);
- frameworks (Laravel, Phalcon);
- JavaScript (Angular, Vue.js, jQuery, some basic NodeJS);
- SQL (MySQL, MariaDB, SQLite);
- MongoDB;
- Elasticsearch;
- Redis, Memcached;
- experience with SOAP and RESTful APIs;
- version control systems (Git, Mercurial, Subversion);
- project management tools (JIRA, YouTrack, Trello, MeisterTask, Worksection);
- server administration (installation and tuning of nginx, php-fpm, MySQL, MongoDB etc.)

Experience

December 2018 - now
